"Tell it to Merrick," Fallows said, making an effort -lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. We can be frank without fear of risking offense. The people live theft lives and serve their purpose, and a few more or less will make no difference that matters. Now tell me again, who are you really worried about?".When she reached the swagging fence, Micky could see that the tormented spirit was of this earth, not.Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. Borftein asked sarcastically..Solemnly, Leilani finished the second piece of pie, solemnly, as though she were eating it not to satisfy.The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-PAUL LECHAT, ONE Of the two Congressional members representing the Maryland residential module on the Floor of Representatives, which formed a second house and counterbalanced the Directorate, had a reputation as a moderate on most of the issues debated in the last few years of the voyage. Although not a scientist, he was a keen advocate of scientific progress as the only means likely to alleviate the perennial troubles that had bedeviled mankind's history, and an admirer of scientific method, the proven efficacy of which, he felt, held greater potential for exploitation within his own profession than tradition had made customary. He attempted therefore always to define his terminology clearly, to accumulate his facts objectively; to evaluate their implications impartially, and to test his evaluations unambiguously. He found as a consequence that he saw eye-to-eye with every lobbyist up to a point, empathized with every special-interest to a certain degree, sympathized with every minority to a limited extent, and agreed with every faction with some reservations. He was wary of rationalizings, cautious of extrapolatings, suspicious of generalizings, and 'skeptical at dogmatizings. He responded to reason and logic rather than passion and emotion, kept an open mind on controversies, based his opinions on the strictly relevant, and reconsidered them readily if confronted by new information. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. "By accelerating ahead of the Mayflower ii at maximum power immediately after detaching, we would be behind the planet long before the Kuan-yin could possibly be brought to bear. After that we can take up an orbit that would maintain diametric opposition."..Wellesley acknowledged with a nod and gestured toward."Eight minutes," Stormbel replied. "But its reaction dish

is still aimed away from us. We are now ready to detach." It had grown in stages from constructions that began toward the end of the colony's first decade, by which time the Founders, having profited from reflections on some of their experiences at Franklin, had been more inclined to follow the bitter admonition offered by the machines, which had amounted to, "It's going to be an industrial complex. If you mess around with it, it won't work." The result was a clean, efficient, functional layout more in keeping with what the Kuan-yin's mission planners had envisaged, suitably modified where appropriate to take account of local conditions. Besides its industrial facilities, the complex included a seaport; an air and space terminal distributed mainly across the islands, which were interconnected by a network of tunnels; a college of advanced technology; and a small residential sector intended more to afford short- to medium-term accommodation for people whose business made it convenient for them to be in the vicinity than to house permanent inhabitants, although about half the population had been there for years. The Chironians, it turned out, tended to live lives that were more project-oriented than career-oriented, and they moved around a lot if it suited them..At the foot of the steps, he's paralyzed by dread.
